The Mini Countryman

The first ever four wheel drive mini is coming out in 2010. FOUR wheel drive, FOUR seats, FOUR-door model. The Countryman name was used in one of the old mini's made by British Leyland so at least they kept the name original but is it anything like a mini. To be a mini it has to be small is it. It could be a brilliant mini or it could be plain boring. It might only be in production for a year. Lets hope its a good car and it does not ruin mini's reputation. It will cost around £48,000 the highest priced mini ever. The Mini First that is in production now only starts at around £10,000.

Not many Classic mini lovers like the new concepts that BMW are bringing out. But some how I think that BMW will win the Classic mini lovers heart over.

Dear customer services Written by Terry Ravenscroft

Terry Ravenscroft has written many books or shall I say letters. His book are very funny and enjoyable to read. I would recommend the book to people that struggle to read books, as it stops you thinking about how many pages you have read and how far you are through the book. Terry Ravenscroft writes to companies customer services and complains or praises there product. The book costs £6.99 RRP. For the price I would say it is worth the money. But don't expect the book to last a month or so as you will get so addicted you will finish it in three days. Terry Ravenscroft other books are: Air Mail, Football Crazy. Liebe Airline, Dear Air 2000 and several more. Terry Ravenscroft has joint up with other authors and wrote a few books. If you have read and enjoyed Terry Ravenscroft books, I would also recommend Robin Cooper who does the same as Terry Ravenscroft but doesn't base his books on one subject.

Fantastic Mr. Fox Film Review

This film was an amazing film. Well it should be after taking 5 years to make. I hope I do not give the Film away. Mr. Fox is bored of living in a hole so he buys a tree and lives in there. Mr. Fox and his friend goes stealing off of three farmers. The farmers find out that it is Mr. Fox and try to get there own back. You'll have to watch the film to know the rest. I thought that was a good film. It was like a Wallace and Gromit. Kids find it funny and Adults find it funny because they notice bit which kids don't understand. It's a film for the whole family. It is a Parental Guidance as it has a lot of fighting.

Xbox 360 or PS3 ?

Everyone knows that the Xbox 360 and the PS3 (Playstation 3) are having a battle for the award of the best games console. The PS3 is around £249.99 and the Xbox 360 arcade around £159.99 and the Xbox 360 elite is around £199.99. Xbox is cheaper in short term. The PS3 is cheaper in long term as you don't have to pay for online a lot of the accessories are cheaper.

The Xbox 360 has two different types of console for sale. The Arcade with around 500mb hard drive and the elite with 120GB hard drive. Xbox used to sell an Xbox Premium for £159.99 with 60GB hard drive, but they stop selling them and brought the price of the arcade up to £159.99 from £129.99

The PS3 have just brought out there PS3 slim. The PS3 slim is much more slimmer then the old version of the PS3. The PS3 has a 120GB and a 250GB hard drive.

Most games you can get on PS3 and Xbox 360. Graphic are just about the same. It is just hard to pick which one.

I personally would buy and Xbox 360 as they have more games that cannot be played on PS3 (Halo 3, Assassins Creed I, Forza etc.) After long hours I have come to a Conclusion : **If you want good gaming get a Xbox 360, If you want cheap gaming get a PS3.**

I hope you have enjoyed the first issue of the Random Times. The next issue will be in January.
